EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard D. Conard on August 19, 2005.

The application has been amended as follows:

On page 21, in line 3 of the specification: The phrase --with at least a portion of each calf support extending from the storage receptacles-- has been inserted after the number "14".

2. The following is an examiner's statement of reasons for allowance: The examiner respectfully agrees with Applicants' arguments on pages 6-8 of their amendment stating that the Clark '578 and Fenwick '876 references (as well as the remaining prior art, taken either singly or in combination) simply do not teach or suggest the use of a patient support apparatus comprising a *frame* which is formed to include a first receptacle; a *deck* which is coupled to the frame and formed to include a second receptacle; and a removable calf support including a mounting portion configured to be received in the first receptacle to retain the removable calf support *beneath the deck with a least portion of the calf support extending from the first receptacle* and configured to be received in the second receptacle such that the removable calf support is

oriented to support a patient's leg *above the deck*, as explicitly recited in Applicants' independent claims 8, 24 and 37. With regards to the prior art, most conventional patient support devices having calf supports are formed only to include a single receptacle to hold a calf support above a deck; furthermore, although the Clark '578 reference is considered to disclose the use of a patient support apparatus comprising first and second receptacles to retain a calf support beneath and above a deck, respectively, the first receptacle of the patient support apparatus of Clark '578 simply does not retain the calf support with at least a portion of the calf support extending therefrom as specifically claimed by Applicants. Since an updated search of the prior art also did not yield any other references pertinent to Applicants' claims, it is considered that the application is currently in full and proper condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert G. Santos whose telephone number is (571) 272-7048. The examiner can normally be reached on Tues-Fr and first Mondays, 10:30 a.m. to 8:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford can be reached on (571) 272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
